Education

Master	Université Grenoble Alpes , Computer Science	Grenoble, France
	- MOSIG program by UGA and Ensimag - Specialization in Parallel Computing and Distributed Systems	2023 – 2025
Bachelor	Bauman Moscow State Technical University , Applied Mathematics and Computer Science	Moscow, Russia
	Program with emphasis on formal methods and compiler construction	2020 – 2023

Experience

VERIMAG , Research Internship	Grenoble, France
Study on timing anomalies caused by branch prediction in out of order processor	Feb 2025 – Sept 2025
Formal methods, Model checking, TLA+	
TIMA (Grenoble INP) , Research Internship	Grenoble, France
Approaching automatic proofs for Chisel high level descriptions of digital circuits	Feb 2024 – Aug 2024
Formal proofs, Isabelle/HOL, Chisel	
Huawei , Research Internship	Nizhnii Novgorod, Russia
Optimization of video memory consumption by compressing images in Mesa3D driver	July 2022 – Aug 2022
C, Mesa3D	

Projects

Formal Language Converter 🔗	2022-2023
A framework to facilitate learning formal language theory. Operations on regular expressions and finite automata and generating a step-by-step description of all transitions in LaTeX.	
- Presented on OSEDUCONF-2023, a conference for educators in IT - I contributed in leading the team of 9 people, planning the architecture and implementing some core algorithms	
Path Tracing 🔗	2023
Rendering realistic images using path tracing. My coursework on the topic of Computer Graphics	
OpenGL, C++ and GLSL fragment shaders	

Skills

Programming: Proficient with C++ and Git. Comfortable with C, Python, Haskell, Java, JavaScript, TypeScript, Ocaml, Golang

Familiar with: Compilers, Cryptology, Operation Research, Computer Graphics, basics of Processor Architecture and Formal Verification, GPUs and Parallel Programming (CUDA, OpenCV, OpenMP)

Languages: English (fluent, C1), French (B1), Russian (native)

Extracurricular Activities

Game Jams: Participated in several game jams. Developed games using C++, JavaScript, TypeScript and Godot engine
