Education

Master	Université Grenoble Alpes , Computer Science • MOSIG program by UGA and Ensimag • Specialization in Parallel Computing and Distributed Systems	Grenoble, France 2023 – 2025
Bachelor	Bauman Moscow State Technical University , Applied Mathematics and Computer Science • Program with emphasis on formal methods and compiler construction	Moscow, Russia 2020 – 2023

Experience

VERIMAG , Research Internship Study on timing anomalies caused by branch prediction in out of order processor • Formal methods, Model checking, TLA+	Grenoble, France Feb 2025 – Sept 2025
TIMA (Grenoble INP) , Research Internship Approaching automatic proofs for Chisel high level descriptions of digital circuits • Formal proofs, Isabelle/HOL, Chisel	Grenoble, France Feb 2024 – Aug 2024
Huawei , Research Internship Optimization of video memory consumption by compressing images in Mesa3D driver • C, Mesa3D	Nizhnii Novgorod, Russia July 2022 – Aug 2022

Projects

Formal Language Converter 🔗 A framework to facilitate learning formal language theory. Operations on regular expressions and finite automata and generating a step-by-step description of all transitions in LaTeX. • Presented on OSEDUCONF-2023, a conference for educators in IT • I contributed in leading the team of 9 people, planning the architecture and implementing some core algorithms	2022-2023
Path Tracing 🔗 Rendering realistic images using path tracing. My coursework on the topic of Computer Graphics • OpenGL, C++ and GLSL fragment shaders	2023

Skills

Programming: Proficient with C++ and Git. Comfortable with C, Python, Haskell, Java, JavaScript, TypeScript, Ocaml, Golang

Familiar with: Compilers, Cryptology, Operation Research, Computer Graphics, basics of Processor Architecture and Formal Verification

Languages: English (fluent, C1), French (B1), Russian (native)

Extracurricular Activities

Game Jams: Participated in several game jams. Developed games using C++, JavaScript, TypeScript and Godot engine
